

Internship Planning

I have a dream, a dream that one day, I will be able to make a game for the stories and characters that I created and loved. In order to make that dream comes true, I studied in both art and programming. While the art can be self-studied easily, programming is a task that requires the user to acquire some kind of guidance and experience in order to reach a certain point as soon as possible.

So for this internship, I researched for gaming related companies that I could apply in order to acquire the experience when it comes to creating and managing games. Through the help from my parents, I was able to come into contact with a company known as “**Magic Box**”. Magic Box is a company that manages online application game which can be useful for me to pursue my future career.

What’s even better is that the company is in Thailand as well as I have absolutely no intention of leaving this country for an internship for now. For now, acquiring all the experience while trying to abuse the country’s low living cost and online part-time job with their foreign minimum wage to make my life as easy as possible is the choice I want to stay as it won’t trouble any of my family.

So for this internship, I intend to go work at Magic Box Asia in Thailand. For further detail in this company, you can contact Mr **Permsiri Tiyaavutiroj (Sam)** **(+(66)8-6555-5123)** who will be taking care of all the internship-related works.
